

Average residential solar battery price per 100MW in Belgium

Can you plug in a solar panel in Belgium?

You cannot just plug in any solar panel or home battery yourself. Only devices homologated by Synergrid can be used in Belgium. Synergrid has a list online, but it is unreadable for the average consumer.

How much does a solar system cost?

The total cost for these systems generally falls between EUR5,000 and EUR12,000, including installation and essential components. A standard 7kWh system, suitable for a three-bedroom home, usually costs around EUR8,500. This investment typically includes the battery unit (EUR4,000-6,000), inverter (EUR1,500-2,000), and installation labour (EUR1,000-1,500).

How much does a solar battery backup cost?

For larger residential properties and small commercial establishments, solar battery backup systems in the 10-20kWh range typically cost between EUR9,000 and EUR18,000. This price range includes premium battery solutions from established manufacturers, advanced inverter technology, and professional installation.

Will the cost of batteries fall in the future?

The cost of batteries may fall in the future... thanks to the development of the electric car. In fact, batteries with capacities that have fallen to 80% could be reused in our homes. According to the Blackrock Investment Institute, the price per kWh of batteries should fall to EUR420/kWh in 2025.

How much does a 7kWh Solar System cost?

A standard 7kWh system, suitable for a three-bedroom home, usually costs around EUR8,500. This investment typically includes the battery unit (EUR4,000-6,000), inverter (EUR1,500-2,000), and installation labour (EUR1,000-1,500). Additional components such as monitoring systems and smart controls add approximately EUR500-1,000 to the total.

How much will batteries cost in 2025?

According to the Blackrock Investment Institute, the price per kWh of batteries should fall to EUR420/kWh in 2025. The available batteries can store between 3 and 20.5 kWh with 5 to 6 kW of power. As an indication, the average consumption of a household (in Brussels with 4 people) is 9.5 kWh/day.

The solar price for residential installations depends on factors like system size, installation costs, location, and available incentives. While residential solar pricing is typically higher per megawatt-hour (MWh) than utility-scale projects, ...

If you generate your own electricity, the battery will allow you to use an average of 60% to 80% of your own electricity. Without a battery, you will only get 30% - 50% (source: Brugel, the Brussels regulator for the gas

Average residential solar battery price per 100MW in Belgium

and electricity markets).

This cost breakdown is different if the battery is part of a hybrid system with solar photovoltaics (PV) or a stand-alone system. The total costs by component for residential-scale stand-alone battery systems are demonstrated in Figure 2 for ...
