

# Average sodium ion battery storage price per 20kW in Sweden

How much will sodium ion batteries cost in 2028?

Assuming a similar capex cost to Li-ion-based battery energy storage systems (BESS) at \$300/kWh, sodium-ion batteries' 57% improvement rate will see them increasingly more affordable than Li-ion cells, reaching around \$10/kWh by 2028.

Is Sweden a good place to invest in battery storage?

As a result, Sweden remains an attractive market for battery storage investment in the years ahead. Sweden's BESS market is evolving with renewable growth, market shifts, and trading strategies. Learn how battery storage can thrive in Sweden's energy future.

Does Sweden have a battery energy storage system?

Sweden has traditionally lagged behind continental Europe in Battery Energy Storage Systems (BESS) growth, but recent developments have propelled rapid expansion. Until 2022, only a few projects were launched, mainly supported by subsidies and specific storage needs.

Are sodium ion batteries a good investment?

Analysing 30 LDES technologies, the research found sodium-ion batteries to hold the most promise due to their fast improvement rate - around 57% in 2024. They offer more efficiency in round-trip energy use, greater operational flexibility and lose less energy during storage and supply.

How much does a sodium ion cell cost in 2024?

The average cost for sodium-ion cells in 2024 is \$87 per kilowatt-hour (kWh), marginally cheaper than lithium-ion cells at \$89/kWh.

Will sodium-ion batteries dominate the future of long-duration energy storage?

With costs fast declining, sodium-ion batteries look set to dominate the future of long-duration energy storage, finds AI-based analysis that predicts technological breakthroughs based on global patent data. Sodium-ion batteries' rapid development could see long-duration energy storage (LDES) enter mainstream use as early as 2027.

In summary, the total cost of ownership per usable kWh is about 2.8 times cheaper for a lithium-based solution than for a lead acid solution. We note that despite the higher facial cost of Lithium technology, the cost per stored and ...

Residential Battery Storage The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the ...
