

# Average sodium ion battery storage price per 250MW in New Zealand

Are sodium-ion batteries available in New Zealand?

The other good news about Sodium-Ion batteries is that they are now available in New Zealand. Aquion Energy, based in Pittsburgh, are manufacturing the battery cells that are being distributed by Taspac throughout New Zealand. Image above: Aquion, S-Line Battery Stack

How much will sodium ion batteries cost in 2028?

Assuming a similar capex cost to Li-ion-based battery energy storage systems (BESS) at \$300/kWh, sodium-ion batteries' 57% improvement rate will see them increasingly more affordable than Li-ion cells, reaching around \$10/kWh by 2028.

Are sodium ion batteries sustainable?

Sodium-ion batteries (SODIUM BATTERY) represent a promising alternative to traditional battery technologies, with significant advantages in terms of cost, resource availability, and environmental impact. As these batteries continue to evolve, their role in sustainable energy storage is expected to expand.

Are sodium-ion batteries a good choice for energy storage?

Compared to Lithium, Sodium is cheap and abundant. If we want to store mass amounts of energy from solar and wind, Sodium-Ion batteries could be a great economic and environmental choice. With energy companies racing to develop energy storage, one can only assume that there will be a breakthrough technology.

Will sodium-ion batteries dominate the future of long-duration energy storage?

With costs fast declining, sodium-ion batteries look set to dominate the future of long-duration energy storage, finds AI-based analysis that predicts technological breakthroughs based on global patent data. Sodium-ion batteries' rapid development could see long-duration energy storage (LDES) enter mainstream use as early as 2027.

When will sodium ion batteries become mainstream?

Sodium-ion batteries are not only improving at a faster rate than other LDES technologies but they are also set to be cost comparable with the cheapest forms of dispatchable power, and therefore enter mainstream use, as early as 2027.
