

# Average sodium ion battery storage price per 2MW in Bolivia

How much will sodium ion batteries cost in 2028?

Assuming a similar capex cost to Li-ion-based battery energy storage systems (BESS) at \$300/kWh, sodium-ion batteries' 57% improvement rate will see them increasingly more affordable than Li-ion cells, reaching around \$10/kWh by 2028.

Are sodium ion batteries a viable option?

Scalability: The scalability of sodium-ion battery production promises substantial economies of scale. As production ramps up, the per-unit cost of batteries is expected to decrease, making them an even more attractive option for large-scale energy storage and electric vehicles.

Will sodium-ion batteries dominate the future of long-duration energy storage?

With costs fast declining, sodium-ion batteries look set to dominate the future of long-duration energy storage, finds AI-based analysis that predicts technological breakthroughs based on global patent data. Sodium-ion batteries' rapid development could see long-duration energy storage (LDES) enter mainstream use as early as 2027.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be  $\$800,000 * 0.08 = \$64,000$ .

How much does a sodium ion cell cost in 2024?

The average cost for sodium-ion cells in 2024 is \$87 per kilowatt-hour (kWh), marginally cheaper than lithium-ion cells at \$89/kWh.

How much does a lithium ion battery cost?

On average, the cost of lithium-ion battery cells can range from \$0.3 to \$0.5 per watt-hour. For a 2MW (2,000 kilowatts) battery storage system, if we assume an average battery cell cost of \$0.4 per watt-hour, the cost of the battery alone would be  $2,000,000 * \$0.4 = \$800,000$ .

The cost of doing business The rapid proliferation of energy storage onto the U.S. grid can be credited (at least partially) to the declining price of lithium-ion (Li-ion) batteries. Globally, battery prices just sustained their ...
