

Average solar diesel hybrid storage price per 1MW in Bulgaria

Why is the market for distributed solar PV growing in Bulgaria?

As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market is occurring despite the lack of a clear policy and regulatory framework, and in spite of the presence of many administrative and tax-related barriers.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

What should Bulgaria do about solar energy?

The authorities in Bulgaria need to take steps to systematically reduce barriers, fees, and surcharges on small and medium-sized solar PV systems, make it easier to connect to the grid and export the surplus electricity, and create a comprehensive policy and regulatory environment to catalyse investments.

Why is the DPV market growing in Bulgaria?

The increasing involvement of companies linked to the DSOs and their subsidiaries in the DPV market in Bulgaria has been driven in part by the EU's Energy Efficiency Directive.⁴⁰ The Directive introduces an obligation on individual Member States to reduce their energy consumption by a certain level by 2020, and by 2030.

Can Customer-Sited solar PV be a driver of the distributed PV market?

In response, the DSOs (through their subsidiary ESCO companies) have honed in on the potential of customer-sited solar PV projects as a tool to help reduce demand from the network, and hence, to help comply with the Energy Efficiency Directive. This has turned them into active drivers of the distributed PV market.

What is Bulgaria's RES share in 2021-2030?

Between 2013 and 2019, the overall RES share has increased only by 2.7% to reach 21.6% in 2019. More recently, Bulgaria's National Energy and Climate Plan (NECP) for the period 2021-2030 sets an overall RES target of 27% in gross final consumption of energy in 2030.
