

Average solar diesel hybrid storage price per 20kWh in Poland

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Should US companies offer battery energy storage systems in Poland?

U.S. Commercial Service recommends that U.S. companies offering battery energy storage systems take a hard look at the Polish market because there will be opportunities for U.S. companies to propose their solutions for many years to come. For more information, please contact Commercial Service Poland at office.warsaw@trade.gov.

How big is Poland's energy capacity?

According to data from the Energy Market Agency, at the end of November 2024, Poland's installed capacity was about 20.7 GW, growing year-on-year by almost 28 percent, and the installed capacity of wind power plants was about 10.2 GW, increasing year-on-year by about 8 percent.

How much storage capacity does Poland have in 2024?

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW.

What will Poland's energy landscape look like in 2025?

Jacek Zarzycki, Business Development Manager at Eaton, highlights five key areas shaping Poland's energy landscape in 2025. 1. Energy Price Caps Extended For individual consumers, the energy price cap will remain in place until September 30, 2025, limiting electricity costs to a maximum of 500 PLN/MWh (plus excise tax and VAT).

Will micro photovoltaic installations grow in 2025?

The popularity of micro photovoltaic (PV) installations is expected to grow in 2025, bolstered by the extension of the "My Energy" program. For the first time, the program requires the installation of energy or heat storage systems integrated with PV panels. Such setups enhance energy self-consumption and stabilize the grid.
