

# Average solar storage container price per 2MW in Belgium

How much do solar panels cost in Belgium?

As of Apr 2023, the average cost of solar panels in Belgium is \$2.48 per watt making a typical 6000 watt (6 kW) solar system \$10,421 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

How will a collaborative approach affect battery storage costs?

This collaborative approach has accelerated manufacturing improvements and cost reductions. Current projections indicate that utility-scale battery storage costs will continue to decrease by 8-10% annually through 2030, driven by increased production volumes and ongoing technological innovations.
