

Average utility scale ESS price per 800kW in Poland

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Does Poland need 10 GW of BESS?

Radwanska, the country manager for Poland with the German aggregator, said that the head of the Polish transmission system operator has targeted 10 GW of utility-scale BESS "as a priority." Poland's electricity market is larger than that of Belgium and the Netherlands combined, she noted. Rapid saturation

Projected Utility-Scale BESS Costs: Future cost projections for utility-scale BESS are based on a synthesis of cost projections for 4-hour duration systems as described by (Cole and Karmakar, 2023). The share of energy and power ...

The electric utility industry typically refers to PV CAPEX in units of \$/kW AC based on the aggregated inverter capacity; starting with the 2020 ATB, we use \$/kW AC for utility-scale PV. Plant costs are represented with a single estimate ...

Base year costs for utility-scale battery energy storage systems (BESS) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2021). The bottom-up BESS model accounts for ...
