

Average warehouse solar storage price per 50kWh in Greece

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

How is storage regulated in Greece in 2022?

In 2022, the Greek Parliament also passed a thorough regulatory framework for storage. Large-scale storage are selected through a bidding process, with a total tendered power capacity of 1,000 MW and at least 2.6 GWh of storage capacity.

How many MW is a battery energy storage system?

It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions. In the latest bidding, nine projects with a four-hour storage duration have been selected for a total capacity of 188.9 MW.
