

# Average wind solar storage price per 2MW in Spain

How much does wind energy cost in Europe?

Wind power prices, on the other hand, are more stable and range between EUR60 and EUR80/MWh. This indicates that wind energy in Europe tends to be less location-dependent than solar energy. However, the key question is: How do these prices compare with the capture prices?

How much wind energy does Spain generate in 2023?

In 2023, wind turbines generated more than 60 terawatt hours of electricity, accounting for over 23 percent of the country's electricity mix. In fact, Spain is one of the countries with the highest wind energy penetration, ranking third after Denmark and Ireland in 2022. Discover all statistics and data on Wind energy in Spain now on [statista.com](https://www.statista.com)!

Is wind power a good source of electricity in Spain?

Some of these data are still provisional so they may vary somewhat when they become definitive, but they will be small changes that will not affect the overall picture. As Red Eléctrica itself announced in December, wind power is once again the leading source of electricity generation in Spain with 23%.

How much does solar PV cost compared to wind?

Solar PV's advantage compared to wind is clear with an average captured price - for the entire mainland Spanish fleet - of 47.8 EUR/MWh (+3.9% compared to the average day-ahead prices) against 41.8 EUR/MWh (-9.3%) throughout the 2014-2017 period. Wind: Castilian Carnage Strong differences can be observed between the most equipped ACs.

How do Renewable Project revenues work in Spain?

So in Spain, more than anywhere else in Europe, renewable project revenues no longer depend exclusively on the produced volumes of electricity, but also on how these volumes are liquidated on power markets. No wonder long-term trends regarding market prices are considered a major concern and subject to many dedicated forecasting services in Iberia.

Why did solar prices fall 40% in Spain vs Germany?

Volume-weighted average capture prices (VWAPs) for solar in Spain fell 40% year over year to Eur45.56/MWh while German solar fell 31% to Eur54.64/MWh amid record PV generation after a boom in installations, according to Platts assessments for Commodity Insights.

Unsurprisingly, there are significant price differences between different countries for solar energy. In Spain, the break-even price for a solar PPA is only EUR38/MWh, while in Finland it is significantly higher at EUR115/MWh - not ...
