BESS project financing options in Mauritius 2025

How will Mauritius transition to a low carbon economy?
Mauritius is transitioning to a low carbon economy,with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is BESS and how does it work?
BESS (Battery Energy Storage System) is a high-tech,ultra-fast response battery systemdesigned to upgrade the electricity grid. It aims to make the electricity network in Mauritius smarter,more modern,and cleaner.

What is the purpose of the BESS upgrade?
This high-tech,latest technology and ultra-fast response battery energy storage system (BESS) is the first of a series of upgrades to the electricity grid in order to achieve a smarter,more modern and cleaner electricity network in Mauritius.

What is Mauritius aiming to reduce dependence on?
The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by,reducing the country's dependence on coal and heavy oil for electricity generation.

What is the second phase of CEB's Bess project?
The second phase of CEB's BESS project will involve the installation of 14MW BESSdeployed in four main substations: Jin Fei (4MW),La Tour Koenig (2MW),Anahita (4MW),and Wooton (4MW). This phase is expected to be completed within 12 months.

What is Mauritius' long term energy strategy?
The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35%by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.
