

Backup power battery cost breakdown in Israel 2025

Why are lithium-ion batteries so expensive in 2025?

In 2025, lithium-ion battery pack prices averaged \$152/kWh, reflecting ongoing challenges, including rising raw material costs and geopolitical tensions, particularly due to Russia's war in Ukraine. These factors have led to high prices for essential metals like lithium and nickel, impacting the production of energy storage technologies.

How much does a battery cost in 2025?

In 2025, you're looking at an average cost of about \$152 per kilowatt-hour (kWh) for lithium-ion battery packs, which represents a 7% increase since 2021. Energy storage systems (ESS) for four-hour durations exceed \$300/kWh, marking the first price hike since 2017, largely driven by escalating raw material costs and supply chain disruptions.

How much does a battery backup cost?

If you're pairing a battery with solar panels, you can expect to pay an extra 10,000-20,000, based on the size of the system. Certain battery backup systems require professional installation for solar integration, while others, like Anker Solix, offer the flexibility of DIY solar charging.

When will battery cost projections be updated?

In 2019, battery cost projections were updated based on publications that focused on utility-scale battery systems (Cole and Frazier 2019), with updates published in 2020 (Cole and Frazier 2020) and 2021 (Cole, Frazier, and Augustine 2021). There was no update published in 2022.

Should you install a whole house battery backup system?

With extreme weather and aging electrical grids causing power outages, homeowners now prefer to install whole house battery backup systems. However, one major concern is the cost of a whole house battery backup, which varies based on capacity, brand, and installation requirements.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.
