Will US energy industry invest \$100 billion in battery energy storage systems?

Members of the US energy industry has committed to investing \$100 billion over the next five years to build and buy American-made batteries for large, utility-scale deployments of battery energy storage systems (BESS).

Why is PE investment in battery energy storage growing?

PE investment in battery energy storage systems is surging, fueled by their high return potential and growing energy transition demands. PitchBook data shows that PE investments in energy storage and infrastructure have more than doubled since 2014, reaching \$21.1 billion in 2024 alone.

Why is the battery industry investing in the United States?

The industry's investment will advance a manufacturing expansion in the United States with the aim of enabling American-made batteries to meet 100% of domestic energy storage project demand.

Are battery storage projects a symbiotic relationship?

Close to half of all battery storage projects are paired with solar or wind energy projects as part of their symbiotic relationship. "Without batteries it would be mayhem," said Izzet Bensusan, founder and CEO of the Captona energy transition investment firm. "The utilities are realizing that without batteries they cannot manage the grid."

Why is battery energy storage important?

"Battery energy storage is key to meeting America's rapidly expanding electricity needs," said Craig Cornelius, President and CEO of Clearway Energy Group. "As we deploy energy storage at record pace, this investment reflects the industry's commitment to building these critical grid infrastructure projects with American-made batteries."

Is battery storage a fundamental part of energy infrastructure?

"Battery storage is now viewed as a fundamental part of energy infrastructure, much like LNG terminals and oil tankers," said Gresham House infrastructure and energy transition investor Lefteris Stakosias. Stakosias said this investment boom reflects a broader shift in the global energy market toward renewables.
