

Battery pack with solar recharger

Should you buy a portable solar battery charger?

A portable solar battery charger is a great option if you're taking an extended camping trip or traveling somewhere with an unreliable power grid, as it'll allow you to charge a phone the size of an iPhone 15 using just a few hours of midday sun.

What devices can I charge with a TACAMO solar power bank?

Charge Devices Off the Grid - Keep your tech arsenal ready for action with the TACAMO Solar Power Bank portable charger battery pack. Featuring dual USB 5V 1A/2A outputs, it is compatible with Android, iPhone, iPad, and other USB-rechargeable devices.

What is the best solar charger for off-grid camping?

100 watts or more: These are the largest solar chargers that you can still pack away to move. They're the best energy-intensive devices and have fast charging speeds to keep your large battery banks or power stations full. A 110-watt panel is best for charging a large power station when off-grid camping.

What is a portable solar charger used for?

Portable solar chargers are best used to power small electrical items, such as smartphones and portable battery packs. They can be perfect for topping up the batteries of devices you might take on a camping trip, but generally aren't much help when it comes to feeding more power-hungry products, such as televisions, portable fridges and kettles.

How many solar chargers are there?

We tested 34 solar chargers to power our adventures, including brands like Jackery, GoalZero, Renogy, and more. A good solar charger lets you power your essential communication and outdoor electronics, no matter how far off the grid you go. Over the last decade, we have tested almost 100 different solar panels of varying sizes.

Can a solar charger save you money?

A solar charger can technically save you money, though you'd need to recharge your devices a lot just to break even on using a solar charger at home. The power output of portable panels simply isn't very high - it's more than enough to charge electronics, but not enough to run appliances or heat tanks of water.
