

Battery storage for solar panels florida

Should you install solar and battery storage in Florida?

By installing solar and battery, Floridians can help their state transition away from its reliance on fossil fuels in addition to reducing their electricity costs, providing backup power for outages, and increasing their home values. There is clearly a lot of upside to owning solar and battery storage in Florida.

Are solar-connected battery storage systems safe in Florida?

We have a proven track record of safely operating solar-connected battery storage systems across Florida. Located in Parrish, Florida, this 409-MW by 900-megawatt-hour (MWh) battery storage system is the size of 30 football fields and has the same charging capacity as approximately 100 million iPhone batteries.

Should you power your home with solar and battery in Florida?

If you're thinking about powering your home with solar and battery in Florida, you could do a lot worse in terms of energy savings and preparing yourself for power outages. Like staying on the grid, for example. Florida is nicknamed the Sunshine State for a reason.

Can you use solar panels in Florida?

And if you pair your solar with battery storage, you'll have backup power for Florida's frequent and long-lasting power outages. Thanks to abundant sun and a strong net metering policy, Florida is an ideal place to power your home with solar panels.

Do solar panels add value to your home in Florida?

Yes, solar panels can add to your home value in Florida and Floridians don't pay property tax on the value added by solar and/or battery storage. According to a study by Zillow, homes with solar panels sold for 4.1% more on average than comparable homes without solar in 2019.

Are solar panels worth it in Florida?

Solar panels are absolutely worth it in Florida. Ample sunshine, sales and property tax exemptions, a strong net metering policy, and frequent power outages make solar and battery storage a worthwhile investment in Florida. Based on a real quote from solar.com, a 7.6 kWh solar system can pay for itself in 6-8 years.

We recommend you contact your local solar company to see if a solar battery storage system is suitable for your home in Florida. In the meantime, you can use our solar calculator to learn more about how much a battery will cost you!
