Will big tech's \$380 billion AI CAPEX boom fuel energy demand?

Big Tech's \$380 billion AI capex boom is fueling demand for chips and energy infrastructure. Chipmakers dominate as the primary beneficiary, but energy providers are critical for powering AI data centers. The hidden winners below will capitalize on the energy demands of Big Tech's AI ambitions, driving significant growth.

Does big Tech have a capital expenditure boom?

Click here to learn more. Big Tech's relentless pursuit of artificial intelligence (AI) has unleashed a capital expenditure (capex) boom, with companies like Microsoft (NASDAQ:MSFT), Amazon (NASDAQ:AMZN), and Meta Platforms (NASDAQ:META) committing to spend hundreds of billions to build AI infrastructure.

How does GeV fit with big tech?

The AI boom requires vast energy to power data centers, and GEV's expertise in nuclear, gas, and renewable energy infrastructure aligns perfectly with Big Tech's needs. For instance, tech giants like Amazon and Microsoft are partnering with energy firms to secure reliable, clean power for AI workloads.

Does Tech drive renewable power purchase agreement Spike?

Top energy news: Tech sector drives renewable power purchase agreement spike; EU proposes gas storage rule extension; weather data 'increasingly important' to energy systems. For more on the World Economic Forum's work in the energy space, visit the Centre for Energy and Materials. 1. Big Tech drives renewable power purchase agreement spike

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Will Vistra capture value from Big Tech's spending spree?

Vistra's ability to provide consistent power to AI infrastructure ensures it will capture significant value from Big Tech's spending spree. Constellation Energy (NYSE:CEG), the largest U.S. nuclear power operator, is a standout beneficiary of the AI-driven energy boom.
