

Black solid phone battery icon

What color is battery icon?

The color can be red, yellow or green depending upon the battery level. Battery icon showing as normal white or black color will change to green with thunder symbol when connected to power source. Note that when the charging reaches 100%, you may not see a thunder symbol inside battery icon.

What does the battery icon on my iPhone look like?

For example, your iPhone battery icon can switch from black to white depending on the background color. The battery icon at the top-right corner of your iPhone screen provides a visual indication of the amount of battery life that you have left.

Why is the battery icon changing color on my iPhone?

The only reason that the color of the battery icon has switched is because the color of the Home screen has been changed. Your iPhone will automatically choose black or white for your regular battery icon based on the color behind it. The color of the icon is the one that provides the most contrast with the color behind it.

What does it mean if a phone icon looks like a bar?

An icon that looks like a phone bar with vibration denotes that the phone is on vibrate mode, and will vibrate for calls and notifications but not make any sounds. A crossed out speaker implies that the phone is on silent mode and will neither make any sounds for calls and notifications nor vibrate for the effect.
