Will Brazil install a battery energy storage system in 2024?

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be installed in 2025.

What is driving Brazilian energy storage demand?

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity by 2030, led by Chinese and United States markets dominated by utility-scale systems.

Who is JL capacitors?

Founded in March 1986, JL Capacitors is dedicated to the manufacture of Electrolytic Capacitors, especially those destined to start single-phase motors used in electric motors in general. Capacitors JL are manufactured with the highest technology in the industry with strict selection of raw materials.
