

Business energy storage cost breakdown in India 2026

Will India's energy storage sector expand fivefold in 2026?

Gandhinagar: India's energy storage sector is projected to expand fivefold between 2026 and 2032 with an estimated investment requirement of INR 4.79 lakh crore, industry body India Energy Storage Alliance (IESA) said.

How big is India's energy storage sector?

India's energy storage sector is poised to attract an investment of Rs. 4,79,000 crore (US\$ 56.07 billion) by 2032, as per the India Energy Storage Alliance (IESA). The sector is projected to grow five-fold between 2026 and 2032, driven by the country's increasing need for energy storage solutions.

How much energy will India need by 2026-27?

The National Electricity Plan (NEP), projected that India will need an energy storage capacity of 16.13 GW (7.45 GW PSP (pumped storage project) and 8.68 GW BESS (battery energy storage system) with a storage capacity of 82.37 GWh (47.6 GWh from PSP and 34.72 GWh from BESS) by 2026-27.

How much does energy storage cost in India?

Ghanshyam Prasad, Chairperson, Central Electricity Authority (CEA), said, "The cost of energy storage systems has already seen a notable reduction, from INR 10 lakh per megawatt per month to approximately INR 2.5 lakh per megawatt over the past 2 to 2.5 years. We will soon release new BESS standards."

How much energy storage will India need by FY27?

According to the National Electricity Plan (NEP), India will require a total energy storage capacity of 16.13 gigawatts (GW) by FY27, consisting of 7.45 GW from Pumped Storage Projects (PSP) and 8.68 GW from Battery Energy Storage Systems (BESS).

What is battery energy storage system (BESS) in India?

With growing solar PV installations and further gaining up in renewable power capacity additions clubbed with enticing business for electric vehicles in India, the rationale behind the battery energy storage systems (BESS) is certain to embellish and gather momentum in the country.

As India progresses towards a greener and more sustainable energy future, Battery Energy Storage Systems (BESS) are emerging as a critical solution for energy storage, grid stability, and renewable energy integration. This article ...
