Will energy storage grow in 2024?

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

Will energy storage growth continue through 2025?

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024, energy storage investments and M&A activity are expected to continue this trajectory through 2025.

Will energy storage development continue to grow in the United States?

Amid ongoing conversations about grid reliability amid growing electricity demand driven in part by booming expansion of data centers and continuing interest in moving away from fossil fuels toward intermittent renewable resources, energy storage development will continue to grow across the United States.

What challenges do energy storage resources face?

Energy storage resources present a distinct set of challenges given their unique nature: unlike conventional or renewable generation, energy storage resources must be charged with electric power, which will sometimes (but not always) be provided by the offtaker.

How did the inflation reduction act of 2022 affect energy storage?

Enactment of the Inflation Reduction Act of 2022 (IRA), which contains significant incentives for energy storage, including availability of the investment tax credit and new manufacturing credits, stimulated much of the expansion.
