

Buy solar battery interconnect cables

How to choose a battery interconnect cable?

To select the proper length of cable, put the battery bank in place and measure the distance between the battery terminals you need to connect. Choose a length that is slightly longer than the measured value. Avoid selecting an interconnect cable that is too long, since this may cause you to bend the cable significantly in order to get in in place.

What wire do I need for a solar inverter?

The wire (or conductors) listed below includes standard PV wire to connect the leads from the solar panels, or USE-2 or THHN conductors rated for home-run lengths from your array combiner box to your charge controller or inverter charger. And of course, the big gauge cable to connect your batteries to form a bank or from the bank to the inverter.
