

Can china-europe energy storage be sold to the power grid

Why should battery storage be a political priority in Europe?

Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness. The mission of the Battery Storage Europe Platform is to make battery storage and flexibility a political priority by: Placing battery storage at the top of the EU agenda for energy security and competitiveness.

How many electrochemical storage stations are there in China?

In terms of developments in China, 19 members of the National Power Safety Production Committee operated a total of 472 electrochemical storage stations as of the end of 2022, with a total stored energy of 14.1 GWh, a year-on-year increase of 127%.

How big is China's energy storage capacity?

According to CNESA data, the capacity of independent energy storage stations planned or under construction in China in the first half of 2022 was 45.3 GW, accounting for over 80% of all new energy storage projects planned or under construction.

How can we improve battery storage in Europe?

Strengthening the business case and regulatory frameworks for battery storage across Europe by accelerating the implementation of existing electricity market and renewable energy legislation, and complementing it with a dedicated EU Flexibility Package and Storage Action Plan.

Why are China's energy storage stations so low?

However, the scale of new independent energy storage stations put into operation in China in the first three quarters of 2022 was approximately 345.5 MW, which was significantly lower than planned or under construction stations. The main reason for this may be that investors lack motivation.

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.
