

# Can municipal investment companies invest in energy storage

Is energy storage a good investment?

Energy storage is an attractive emerging high-growth sector. It's still wide open with many upcoming companies. The market has seen more pure energy storage players coming online with different technologies. These are often high-risk, high-reward investments. ESS (energy storage solutions) offers a compelling new segment in renewable energy.

Why do companies invest in energy-storage devices?

Historically, companies, grid operators, independent power providers, and utilities have invested in energy-storage devices to provide a specific benefit, either for themselves or for the grid. As storage costs fall, ownership will broaden and many new business models will emerge.

What are the future opportunities for energy storage?

Energy storage is a fast-emerging sector. Pumped hydro is the most used solution for now. Batteries are the next step to support renewable energy. Lithium technologies lead the way, but many upcoming technologies have different benefits. I provide an overview of possible opportunities.

Who needs energy storage?

Large energy consumers ranging from factories to large campuses need this type of storage in spades. The US armed forces has been a leader in the development of micro-grid and standalone energy systems.

Is it profitable to provide energy-storage solutions to commercial customers?

The model shows that it is already profitable to provide energy-storage solutions to a subset of commercial customers in each of the four most important applications--demand-charge management, grid-scale renewable power, small-scale solar-plus storage, and frequency regulation.

Should oil companies invest in Energy Vault?

They can and will transition customers to better tech down the road. Energy Vault is an energy storage solution that is also tech agnostic. It will store electrons produced by hydro as easily as those produced by wind or solar. @vooch Good point, major oil companies are investing in renewables as well.
