

# Can the energy storage of south china engineering be used to test the power grid

Will China's electrochemical energy storage be the main force of power grid energy storage?

And China's electrochemical energy storage is relatively mature especially the research of VRFB is leading worldwide and is hopeful to be the main force of power grid energy storage.

How can China improve the construction of energy storage technology standard system?

In the future, China should strengthen the construction of energy storage technology standard system from three aspects. First of all, quicken the pace of establishing basic standards and revising the existing standards. Technology standards, design specifications and other requirements are of the basic standards of energy storage technologies.

How many electrochemical storage stations are there in China?

In terms of developments in China, 19 members of the National Power Safety Production Committee operated a total of 472 electrochemical storage stations as of the end of 2022, with a total stored energy of 14.1GWh, a year-on-year increase of 127%.

Are China's Energy Storage Technology Standards perfect?

But the existing energy storage technology standards in China are not perfect, and a standardization system for the whole industry has not been established, let alone testing and approving products according to relevant standards.

Does China's power grid have a peak-shaving system?

At present, China's power grid peak-shaving mainly depends on PSS. But PSS is subject to geographical conditions. Small peak-shaving system, like high-capacity energy storage battery, can realize multiple-point peak load regulation on the micro level and is unconstrained by geographical condition.

Why is energy storage technology needed in China?

In China, RES are experiencing rapid development. However, because of the randomness of RES and the volatility of power output, energy storage technology is needed to chip peak off and fill valley up, promoting RES utilization and economic performance.
