

Cheapest hybrid solar inverter installation offer in New Zealand

Who is a hybrid solar power installer?

Sunergy is your experienced Hybrid Solar Power installer for residential homes. Hybrid solar uses solar, battery and grid power. Our expert-designed solar energy installations can pay off and continue saving on power bills.

What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

What is a hybrid solar inverter?

Hybrid solar is still grid-tied but has a battery bank available so that excess energy is used to charge the batteries. Stored energy can then be used in the evenings and overnight. Hybrid solar inverters also have an emergency power function so that essential loads can be run off the solar panels or batteries in the event of a power failure.

Which Inverter should I buy in New Zealand?

In New Zealand, we strongly recommend GoodWe's range of inverters. GoodWe's main advantage is having 3 MPPT's, which allow greater flexibility on how panels can be arranged and distributed on your roof to generate the most power.

Why should you choose a solar panel system in New Zealand?

Dependable- Your family has constant access to power whether your panels are generating energy (daytime) or not (night time). So you never have to worry about running out. In New Zealand you currently get paid for the extra power that you are generating and putting back to the grid.

What types of solar inverters are available in Aotearoa?

Victron inverters are also super versatile, allowing you to connect solar batteries, generators, and even other forms of renewable power generation, such as wind turbines and micro-hydro solutions. Now, hybrid inverters are fast becoming the most popular type of solar inverter available in Aotearoa.

A single 440W solar panel in New Zealand costs around \$230. But panels are just one part of the puzzle - you'll also need an inverter, mounting gear, and professional installation to turn those panels into a fully functioning solar power ...

Installation comes standard from most solar panel companies, but check to see if there are additional extras such as monitors. Batteries, which store your power rather than selling it into the grid, remain very expensive to purchase in New ...
