

Cheapest solar plus storage installation offer in Czech

Are photovoltaic power plants available in the Czech Republic?

In the Czech Republic, the availability of photovoltaic power plants for households has never been better. According to pwXchange, the wholesale price of solar panels has halved since December 2022. Those who install a typical rooftop power plant can now save up to a hundred thousand crowns compared to the previous year.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

What incentives are there for onsite generation in the Czech Republic?

At the same time, stakeholder and regulatory pressure encouraged Czech organisations to invest in renewable power. There are several EU incentives to spur the growth of onsite generation. For example, the Modernisation Fund supports investments in energy efficiency, storage, network upgrades and the re-skilling of workers.

Is there a potential for solar installations in Europe?

There is a huge potential for solar installations, with ideal climate conditions and substantial funding coming from the EU. The situation is similar in other areas of Central and Eastern Europe, where Wattstor has already completed a number of successful renewable energy installations - such as Poland, Croatia and Slovakia.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits ...

Until end of May, Czech companies can apply for funding if they are planning a PV installation with a storage option. This is meant to increase the available storage capacities, as 5 kw/h of battery storage is required for every ...
