

What energy storage technologies are available in China?

Currently, there are dozens of new energy storage technology routes in China, including advanced compressed air energy storage, flywheel energy storage, lithium iron phosphate batteries, vanadium redox flow batteries, and sodium-ion batteries, each suitable for different scenarios based on their characteristics.

What is the future of energy storage in China?

The new energy storage market in China has great development potential in the future. The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research White Paper 2025 released by the Institute of Engineering Thermophysics on 10 April.

How big is China's energy storage capacity?

The China Energy Storage Alliance said in the first half of 2025, newly commissioned novel energy storage projects in China reached 23.03 gigawatts, representing a year-on-year increase of 68 percent in power capacity.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

How can we improve China's energy storage industry?

She also suggested refining market systems to boost efficiency and strengthen safety management alongside innovative pilot programs, so as to foster the high-quality, sustainable development of China's new energy storage industry.

Is China's energy storage sector growing?

According to the report, China's energy storage sector has maintained a rapid growth momentum from 2023, with new energy storage capacity expanding from 8.7 million kilowatts in 2022 to 31.39 million kW last year. On the other hand, new energy storage plants in China are increasingly shifting toward centralized, large-scale installations, it said.
