

Chinese ev solid state battery

1 · SAIC MG, a Chinese EV maker might have just sent shock waves in the EV world after it unveiled the world's first commercial semi-solid-state battery powered vehicle at the China Auto show on Friday, as per reports. The car, ...

Solid-state batteries, as the name suggests, use a solid instead of a liquid electrolyte, such as those found in today's EV batteries, to stimulate the transfer of electrons. GAC Aion claims its batteries can offer range that "can ...
