

# Commercial energy storage project financing options in Sweden 2025

Why are large battery storage facilities being built in Sweden?

The commissioning of large battery storage facilities is part of Sweden's strategy to enhance grid resilience and promote the widespread adoption of renewable energy technologies. Technological advancements in BESS, particularly in lithium-ion and alternative battery technologies, are shaping the market landscape.

Does BW ESS have a green loan agreement with Nordea?

On 28 April 2025, BW ESS, through a partnership with Ingrid Capacity AB, announced that it had entered into a green loan agreement with Nordea in order to finance a 211 MW operational BESS portfolio in Sweden. The portfolio of 14 large-scale BESS facilities is the largest in the Nordics.

How do infra funds help wind and solar projects in Sweden?

Infra funds like GreenVoltis play a key role in providing structured financing to improve project bankability and long-term profitability. An increasing number of wind and solar developers in Sweden are expanding into BESS project development, but grid constraints remain a significant hurdle. Limited grid connection capacity is slowing deployment.

What is the future of the EV market in Sweden?

The Swedish automotive market is rapidly transitioning towards hybrid and electric vehicles (EVs), with EVs accounting for a significant portion of new car sales in January 2025. This trend is a major driver for the BESS market, as energy storage systems are crucial for supporting the infrastructure required for EV charging and grid stability.

How much money does BW ESS invest in Ingrid capacity?

BW Group invested around SEK 1 billion into Ingrid Capacity in April 2023. According to BW ESS' website, the 14 batteries which are the subject of the green loan are between 5 MW and 20 MW in scale and "generally" have an hour of storage capacity. BW ESS is active in the UK, Australia, Italy, Germany, and Sweden.

Who are the most active Bess developers in Sweden?

Ingrid is one of the most active BESS developers in Sweden. Image: Ingrid Capacity. In this installment of our Year in Review series, we hear from developer and independent power producers (IPPs) Econergy and Ingrid Capacity, both active in the European market.

After debt payments have been made, other investors (like equity investors) will be paid. In general, project's assets are used as collateral to the loan. This type of financing is common in renewable energy projects because building solar, ...
