

# Consumer reports solar powered charger phone aa aaa batteries

Can a solar battery charger charge AA & AAA batteries?

Yes, a solar battery charger can charge typical consumer-size AA and AAA rechargeable batteries, including C and D. When the power grid goes down, the sun keeps shining! We can harness that energy with a solar charger for rechargeable batteries.

What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

Is a solar battery charger useful?

A solar powered battery charger like the one pictured above is a practical preparedness item. It can charge typical consumer-size AA & AAA rechargeable batteries, including C & D. When the power grid goes down, the sun keeps shining, and you can harness that energy to charge your batteries.

Should you buy a portable solar battery charger?

A portable solar battery charger is a great option if you're taking an extended camping trip or traveling somewhere with an unreliable power grid, as it'll allow you to charge a phone the size of an iPhone 15 using just a few hours of midday sun.

What types of batteries can the solar charger charge?

The solar powered battery charger will charge typical consumer-size AA & AAA rechargeable batteries including C & D. It is a practical preparedness item to have, especially when the power grid goes down, and the sun keeps shining.

How much power does a solar battery charger produce?

The most compact and lightweight solar battery chargers typically produce somewhere between 15 and 50 watts of max power. Devices in this wattage range are best suited for charging personal electronic devices, like cell phones, Bluetooth speakers, smartwatches, and GPS devices, or small external power banks that you could use to top off a phone.
