

# Containerized BESS cost vs benefit calculation in Singapore

How do containerised Bess costs change over time?

How containerised BESS costs change over time. Grid connection costs. Balance of Plant (BOP) costs. Operation and maintenance (O&M) costs. And the time taken for projects to progress from construction to commercial operations. Other variables add costs to projects.

What is a customised Bess solution?

The customised BESS solution can be integrated with energy generated by renewable sources, encompassing Digital Technology and Application Programs and can be used for applications such as peak shaving, load balancing, spinning reserve, etc. OFF-GRID ENERGY STORAGE POWER

Does Bess have cost competitiveness against traditional generators in Singapore?

Results show that under the current electricity market rules in Singapore, BESS has no cost competitiveness against traditional generators as regulation service providers.

Should Bess be included in Singapore's electricity market?

BESS' have round-trip efficiencies of approximately 80%, thus they incur a significant operating cost to procure net energy. To enable participation of BESS in Singapore's electricity market, special incentives that reward fast - responding regulation providers may be required. Berrada, Asmae, Khalid Loudiyi, and Izeddine Zorkani. 2016.

Who can apply for Bess funding in Singapore?

Only construction firms registered in Singapore under SSIC codes 41-43 (general construction and civil engineering codes) are directly eligible to apply for BESS funding under the EEG . This means contractors and builders can tap the grant for battery units to power their site operations.

How much does a Bess subsidized battery system cost?

In short, an eligible SME can get 70% of their BESS cost subsidized, capped at \$30k for the base tier. This is a substantial saving, effectively shouldering most of the cost of a typical battery system unit. Larger projects can potentially get up to \$350k if they achieve massive energy savings.

In this way, the cost projections capture the rapid projected decline in battery costs and account for component costs decreasing at different rates in the future. Figure 3 shows the resulting utility-scale BESS future cost projections for the ...
