

# Cost to install batteries for solar system

How much does it cost to install a solar battery system?

Most whole-home solar battery systems require a professional installation--especially if you need to rewire your home or directly work with your electrical wiring in any way. Hiring a local solar contractor to install your solar battery system costs anywhere from \$2,000 to \$3,500 on top of the cost of the solar battery system itself.

How much does it cost to install a solar battery in 2025?

The average cost to install a solar battery in 2025 is between \$9,000 and \$19,000, with the average homeowner paying around \$13,000 on average.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does it cost to install a battery?

On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh. Update: This tax is only available to home battery storage systems installed by December 31, 2025. Here's what that looks like for common battery system sizes:

Should I install a solar battery system?

However, installing a solar battery system is best left to the pros. Most whole-home solar battery systems require a professional installation--especially if you need to rewire your home or directly work with your electrical wiring in any way.

Are solar battery installations cost-effective?

There are many financial solar incentives and rebates available to make solar battery installations more cost-effective. Most importantly, home solar and standalone energy storage systems at least 3 kWh in capacity may qualify buyers for a federal income tax credit (ITC) worth 30% of total project costs.
