

Data of kwh cost of rooftop solar by state

How much does a solar system cost?

An average-sized residential system has dropped from a pre-incentive price of \$40,000 in 2010 to roughly \$26,880. Recent utility-scale PPA prices range from \$16/MWh - \$35/MWh, competitive with all other forms of generation. Over the past 10 years, solar prices have declined. However, for the past 3 years, prices have been volatile.

What percentage of solar installations are residential?

Of the total solar capacity installed in the U.S., over 26 percent corresponds to residential installations. This segment has grown in recent years, reaching some 4.7 million installations in 2023. Increasing household electricity bills are a large motivator for the installation of residential solar systems.

How much does solar cost per watt?

We often reference the cost-per-watt (\$/W) of solar to compare the value of a quote against the national average. According to the most recent data from the EnergySage Marketplace, the average cost-per-watt across the U.S. is around \$2.53/W before incentives.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

What percentage of new residential solar capacity is paired with storage?

Over 28% of all new residential solar capacity was paired with storage in 2024, compared to under 12% in 2023. California's shift in net metering policy and state incentives for solar+storage in other markets have driven attachment rates up in recent quarters.

How much money can you save on solar energy in 2022?

Furthermore, the Inflation Reduction Act, passed in August 2022, modified and extended clean energy investment tax credits, with households able to save up to 30 percent in their solar installation until 2032.
