

What are the different types of energy storage?

Note that other categorizations of energy storage types have also been used such as electrical energy storage vs thermal energy storage, and chemical vs mechanical energy storage types, including pumped hydro, flywheel and compressed air energy storage. Fig. 10. A classification of energy storage types. 3. Applications of energy storage

What are the different types of batteries?

Batteries are mature energy storage devices with high energy densities and high voltages. Various types exist including lithium-ion (Li-ion), sodium-sulphur (NaS), nickel-cadmium (NiCd), lead acid (Pb-acid), lead-carbon batteries, as well as zebra batteries (Na-NiCl<sub>2</sub>) and flow batteries.

What are the two types of mechanical energy storage systems?

Mechanical energy exists in two primary forms: potential and kinetic. Systems such as pumped hydro storage (PHS) and compressed air energy storage (CAES) store potential energy while flywheel energy storage systems (FESSs) store kinetic energy.

What are the different types of chemical energy storage systems?

The most common chemical energy storage systems include hydrogen, synthetic natural gas, and solar fuel storage. Hydrogen fuel energy is a clean and abundant renewable fuel that is safe to use. The hydrogen energy can be produced from electrolysis or sunlight through photocatalytic water splitting (16,17).

What is a battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) is a significant subcategory of ECES, made up of a series of interconnected battery cells that charge and discharge energy in an efficient manner. Every battery cell has three main elements like an anode, a cathode and an electrolyte, which enable the movement of electrons during charging and discharging.

How many types of thermal energy storage systems are there?

It was classified into three types, such as sensible heat, latent heat and thermochemical heat storage system (absorption and adsorption system) (65). (Figure 14) shows the schematic representation of each thermal energy storage systems (66). Figure 14. Schematic representation of types of thermal energy storage system. Adapted from reference (66).
