

What are the different types of energy storage devices?

Flexible energy storage devices, including Li-ion battery ( 122 ), Na-ion battery ( 7 ), and Zn-air battery ( 123 ); flexible supercapacitors, including all-solid-state devices ( 124 ); and in-plane and fiber-like micro-supercapacitors ( 125 ) have been reported.

Can programmable electrochemical energy storage devices power future wearable and biointegrated electronics?

Leveraging these customizable electrochemical energy storage devices will shed light on smarter programmable electrochemical energy storage devices to power future wearable and biointegrated electronics. To access this article, please review the available access options below. Read this article for 48 hours.

What is the future trend in energy storage materials?

In addition,the future trend in the development of highly efficient,cost-effective and renewableenergy storage materials have also been highlighted. 2. History of energy storage devices and materials There are number of energy storage devices have been developed so far like fuel cell,batteries,capacitors,solar cells etc.

What is a customizable electrochemical energy storage device?

A customizable electrochemical energy storage device is a key component for the realization of next-generation wearable and biointegrated electronics. This Perspective begins with a brief introduction of the drive for customizable electrochemical energy storage devices.

Do wearable electronics need energy storage devices?

Wearable electronics ( 116 ) will require the incorporation of energy storage devices. This means that we need energy storage fibers,fabrics,and textiles and the ability to incorporate energy-storing materials into clothes.

What are smart energy storage devices?

Smart energy storage devices,which can deliver extra functions under external stimuli beyond energy storage,enable a wide range of applications. In particular,electrochromic (130),photoresponsive (131),self-healing (132),thermally responsive supercapacitors and batteries have been demonstrated.
