

Energy storage investment years

What is the future of energy storage?

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by battery energy storage systems (BESS). Last year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%.

How much money is invested in battery energy storage in 2022?

Global investment in battery energy storage exceeded USD20billion in 2022, predominantly in grid-scale deployment, which represented more than 65% of total spending in 2022.

Should you invest in future energy storage technologies?

Additionally, the investment threshold is significantly lower under the single strategy than it is under the continuous strategy. Therefore, direct investment in future energy storage technologies is the best choice when new technologies are already available.

What is the value of energy storage technology?

Specifically, with an expected growth rate of 0, when the volatility rises from 0.1 to 0.2, the critical value of the investment in energy storage technology rises from 0.0757 USD/kWh to 0.1019 USD/kWh, which is more pronounced. In addition, the value of the investment option also rises from 72.8 USD to 147.7 USD, which is also more apparent.

Is energy storage a good investment strategy?

However, for new technologies, the investment cost is lower and the benefit is higher, which has a better investment value than the current energy storage technologies. Additionally, the investment threshold is significantly lower under the single strategy than it is under the continuous strategy.

How to choose the best energy storage investment scheme?

By solving for the investment threshold and investment opportunity value under various uncertainties and different strategies, the optimal investment scheme can be obtained. Finally, to verify the validity of the model, it is applied to investment decisions for energy storage participation in China's peaking auxiliary service market.
