What is the lithium-ion battery market database?

Database contains the global lithium-ion battery market supply and demand analysis, focusing on the cell segment in the ESS sector. We compile detailed data on various businesses' capacity, production, and shipments, as well as segmenting the market applications such as FTM, BTM-C&I, and BTM-Residential.

Why is lithium so important?

Lithium has become a critical resource in the modern world, powering everything from electric vehicles (EVs) to renewable energy storage systems. As demand continues to rise, the world's largest lithium producers are competing to secure their place in the global lithium market.

What is the future of lithium?

The main demand driver for lithium is what happens in the electric vehicle industry, which is expected to keep growing, and also the energy storage space. Analysts remain optimistic about the future of lithium, with many predicting the market will be tight for some time.

Which country is a leader in lithium refining?

China, with its extensive refining capabilities, holds a dominant position in the lithium market. The country hosts 60% of the world's lithium refining capacity, making it a pivotal player in converting raw lithium into battery-grade materials.

Which companies produce lithium in the electric vehicle market?

The top lithium-producing companies, such as Albemarle, Mineral Resources, Sociedad Química y Minera de Chile, Arcadium Lithium, and Ganfeng Lithium, are at the forefront of this booming market. Investment opportunities in the electric vehicle market also include technological advancements in lithium battery production.

What is the market cap of lithium?

Smaller players like Lithium Americas (Canada) and Standard Lithium (Canada) have market caps of \$0.55 billion USD and \$0.23 billion USD, respectively. While they hold a relatively minor market share, they continue to contribute to the global lithium supply, focusing on North American expansion projects.
