

# Energy storage power station crossing accident

What are the different types of energy storage failure incidents?

Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C&I) failures. Other Storage Failure Incidents - this table tracks incidents that do not fit the criteria for the first table. This could include failures involving the manufacturing, transportation, storage, and recycling of energy storage.

Where can I find information on energy storage safety?

For more information on energy storage safety, visit the [Storage Safety Wiki Page](#). The BESS Failure Incident Database was initiated in 2021 as part of a wider suite of BESS safety research after the concentration of lithium ion BESS fires in South Korea and the Surprise, AZ, incident in the US.

What are other storage failure incidents?

Other Storage Failure Incidents - this table tracks incidents that do not fit the criteria for the first table. This could include failures involving the manufacturing, transportation, storage, and recycling of energy storage. Residential energy storage system failures are not currently tracked.

What happened at a Kleen Energy Power Plant?

The fire, which burned for a week, started after sugar dust sparked and then ignited. Five workers were killed during a cleaning procedure at a Kleen Energy power plant in Middletown, Conn., in 2010. The workers were using pressurized natural gas to clean pipes when the gas ignited and exploded.

What happened to a battery energy storage system in East Hampton?

Just before the end of May, a 5MW/40MWh battery energy storage system (BESS) in East Hampton, on New York's Long Island, experienced an "isolated fire". The system is owned by National Grid and was developed in partnership with a NextEra Energy Resources subsidiary.

What happened at accurate energy systems?

Austin Anthony for The New York Times An explosion at Accurate Energetic Systems, a company in Hickman County, Tenn., that produces explosives and demolition charges for the U.S. military and the domestic blasting industry, underscores the dangers inherent in the fabrication and storage of such material.
