

What is an EPC & why do I need one?

An EPC plays a critical role in the design and construction of new battery energy storage projects. We're keen to keep an up-to-date and free-to-access list for all market participants. Contact: web enquiries webenquiries@anesco.co.uk

What services does EPC energy offer?

With over 650 MWh installed and commissioned, our experienced team can provide in-house design and engineering services, along with end-to-end support including commissioning, operations & maintenance, plus extended warranties. We make energy efficiently. Copyright © 2024. EPC Energy, Inc. CSLB #1086692.

What are battery energy storage systems (BESS)?

Battery Energy Storage Systems (BESS) offer transformative advantages, making energy management more efficient, reliable, and sustainable. Such systems enhance energy reliability by ensuring a stable power supply, even during disruptions.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) play a pivotal role in various applications to enhance energy efficiency and sustainability. We store excess solar and wind energy in batteries to address intermittent issues for consistent grid delivery.

What is station use energy?

Station Use: "Station use" energy refers to energy that is required for the operation of an energy generation or storage resource in order for such resource to operate. For certain types of resources the station load can be significant.

Does Clarke Energy provide full EPC wrap?

With a strong balance sheet, Clarke Energy will provide Full EPC Wrap for BESS projects and will also consider Balance of Plant EPC on larger BESS schemes. Clarke Energy has a strong aftersales service support network with over 130 UK based Field Service Engineers.
