

# Energy storage september 2023

Will energy storage grow in 2023?

Global energy storage's record additions in 2023 will be followed by a 27% compound annual growth rate to 2030, with annual additions reaching 110GW/372GWh, or 2.6 times expected 2023 gigawatt installations. Targets and subsidies are translating into project development and power market reforms that favor energy storage.

How much energy storage does the world have in 2023?

As of the first half of 2023, the world added 27.3 GWh of installed energy storage capacity on the utility-scale power generation side plus the C&I sector and 7.3 GWh in the residential sector, totaling 34.6 GWh, equaling 80% of the 44 GWh addition last year. Despite a global installation boom, regional markets develop at varying paces.

Will China add more energy storage capacity in 2023?

InfoLink expects China to add 39 GWh of energy storage capacity in 2023. The U.S. added 8.2 GWh of installed energy storage capacity in the first half of 2023, far behind anticipations. Constructions under the IRA face delays worse than expected.

Which countries will add more energy storage capacity in 2023?

France and Germany launched tenders successively. In 2023, Europe may add 17 GWh of installed energy storage capacity, with 9 GWh in the residential sector. Overall, China, the U.S., and Europe saw installed capacities growing at varying paces in the first half of 2023.

Will 9% of energy storage capacity be added by 2030?

We added 9% of energy storage capacity (in GW terms) by 2030 globally as a buffer. The buffer addresses uncertainties, such as markets where we lack visibility and where more ambitious policies may develop that we haven't predicted. We revised our buffer calculation methodology in this market outlook.

How much money will be allocated to storage projects in 2023?

Residential batteries are now the largest source of storage demand in the region and will remain so until 2025. Separately, over EUR1 billion (\$1.1 billion) of subsidies have been allocated to storage projects in 2023, supporting a fresh pipeline of projects in Greece, Romania, Spain, Croatia, Finland and Lithuania.
