

Energy storage station insurance

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

Are battery energy storage systems transforming the energy landscape?

The energy landscape is undergoing a profound transformation, with battery energy storage systems (BESS) at the forefront of this change. The BESS market has experienced explosive growth in recent years, with global deployed capacity quadrupling from 12GW in 2021 to over 48GW in 2023.

How long do energy storage systems last?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties.

Why do we need reliable energy storage systems?

Renewables like wind and solar energy are intermittent by nature. To successfully master the energy transition, reliable energy storage systems are a must to provide the necessary supply stability.
