

Eon solar and battery

Does Eon offer solar battery storage?

In addition to solar panels, E.ON also offers solar battery storage options, including a 5.1 kWh usable capacity battery, which allows customers to store excess energy generated during peak sunshine hours for later use.

How much do Eon solar panels cost?

E.ON solar panels cost between £4,995 and £7,033, while a typical 4kW system for 2-3 bedroom homes in the UK costs around £5,000 - £6,000 installed. E.ON solar panels have an impressive Trustpilot rating of 4.4 out of 5, with customers praising their excellent service, flexible payment options, and ease of switching between energy plans.

Which solar panels does Eon install?

E.ON installs high-quality solar panels from manufacturers like JA Solar and JinkoSolar. The specifications of these panels are as follows: It's worth noting that the solar panel models presented above are merely examples. These panels provide high efficiency and significant power output, consistent with industry standards.

Does Eon solar have a problem with customer service?

While E.ON's solar reviews praise their professional installations and features like bird deterrents and the E.ON Home app, some customers report challenges with customer service, including communication delays and difficulties reaching support representatives.

Why should you choose Eon next solar?

Flexible payment plans: E.ON Next Solar offers interest-free finance for over 36 months, making solar installations more accessible. Comprehensive packages: The inclusion of bird deterrents and the E.ON Home app for energy management enhances the overall value.

What are the pros and cons of Eon solar panels?

The biggest pros of E.ON's solar panels include flexible payment options and comprehensive packages with features like bird deterrents and the E.ON Home app for energy management, while the biggest cons are limited to regional availability.
