

# Expected ROI of battery storage container project in India 2025

How much will battery storage cost in India in 2025?

Battery storage investment in India is expected to cross \$1 billion in 2025; however, high financing costs remain a challenge, according to a recent report by the International Energy Agency (IEA).

How big is battery storage investment in India?

Battery storage investment in India stands out, and is expected to surpass \$1 billion in 2025. The report also shared that globally, investment in battery storage grew by 45 per cent in 2024 compared to the previous year.

Is battery storage investment still a challenge?

The report noted that while battery storage investment continues to rise globally, challenges remain, particularly in developing economies like India, where high financing costs are still a major hurdle.

Why are battery storage projects difficult in India?

In India, however, despite the strong growth forecast, battery storage projects face difficulties due to high financing costs. These costs are nearly double compared to those in advanced economies, making it harder for such projects to achieve profitability.

Should emerging economies invest in battery storage?

IEA says, while global investment in battery storage is on a strong upward path, emerging economies like India must address financing barriers to fully realize their potential in the battery storage market. What are your thoughts?

What is the future of battery storage in Europe?

The situation in Europe presents a contrasting picture. After a decade of strong growth, the battery storage market in Europe slowed down in 2024. Despite this, power price volatility in the region is expected to drive future demand for storage, making policy support even more critical.

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the largest of its kind in South Asia. ...
