

# Expected ROI of commercial energy storage project in Poland 2025

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Are energy storage systems a new technology in Poland?

Energy storage systems are a relatively new technology in the Polish capacity market. They have participated in two auctions so far: making their official debut in 2022 (with 2027 delivery year) and subsequently dominating the competition in the 2023 auction.

What does ENEX 2025 tell us about energy storage in Poland?

The insights from Enex 2025 reinforce that BESS is no longer an emerging trend--it's a critical part of Poland's energy transition. With favorable market reforms and growing investment interest, the country is well-positioned to capitalize on energy storage innovations.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

What happened to energy storage in Poland?

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the supplementary auctions for 2012-2025, contracts for energy storage with a total capacity of 9.5 GW were concluded.
