

# Expected ROI of containerized BESS project in Argentina 2026

How many MW of battery energy storage will be deployed in Buenos Aires?

The initiative aims to deploy 500MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded expectations--reaching a combined 1,347MW

What factors affect the ROI of a Bess?

External Factors that influence the ROI of a BESS The cost of electricity, including peak and off-peak rates, significantly impacts the ROI. Energy storage systems can store cheaper off-peak energy for use during expensive peak periods.

How to assess the financial viability of a Bess?

To accurately assess the financial viability of a BESS, several key indicators are used. This is a list of the main indicators we need to know and understand in order to assess the ROI. Here, we explain briefly what each one means: Total Cost of Ownership (TCO) The comprehensive cost of owning and operating the ESS over its entire life cycle.

How do government subsidies affect ESS installations?

Subsidies, tax credits, and rebates offered by governments can enhance the financial attractiveness of ESS installations. BESS can provide grid services like frequency regulation, demand response, and ancillary services, generating additional revenue streams. Internal Factors that influence the ROI of a BESS

The BRPL BESS project is the first commercial standalone BESS project at the distribution level in India to receive regulatory approval for a capacity tariff and will play a pivotal role in facilitating the uptake of low-cost ...
