

Expected ROI of factory solar storage project in Ireland 2025

Why is Ireland's solar energy sector growing?

Ireland's commitment to renewable energy is driving significant growth in its solar energy sector, reflecting a broader shift towards sustainable energy solutions. The solar energy market has grown significantly in recent years, driven by technological advances and declining costs.

What is the scale of solar in Ireland 2025 report?

Solar Ireland has launched the Scale of Solar in Ireland 2025 Report to mark European Solar Day, capturing the latest trends, milestones and insights on how solar is powering Ireland's clean energy transition. The report also highlights: Explore the key data, sector insights and community stories in this year's report.

Will 2025 be a big year for solar power in Ireland?

2025 promises to be a huge year for solar power in Ireland with the ever growing number of homes and businesses installing rooftop solar, and the growing number of solar farms in the country under construction or in the pipeline. Lets look at some of things which we may come to see in the coming year for the solar energy sector.

How much does a solar system cost in Ireland?

The cost of getting a domestic solar PV system in Ireland has fallen to EUR7,000 - EUR10,000, with a payback period of just 6 or 7 years. That is a dramatic improvement from just a few years ago when you might expect it to take 10 years to pay for your solar panels.

How has solar capacity changed in Ireland?

This has begun to change with total solar capacity in Ireland doubling last year. The Irish Solar Energy Association's 2024 Scale of Solar Report showed that solar capacity grew by 42.6% by mid 2024, and expanded further to a projected 1,600MW of capacity by the end of the year.

Does Highfield energy have a solar project in Ireland?

Highfield Energy has been one of the most active in Ireland, when incorporating energy storage alongside solar farms, with at least 15 applications submitted with this pairing. The company also has a few standalone projects with Aura Power; however, these predominantly date back to 2018.

While the energy storage pipeline in Ireland remains strong, it is unlikely to see a similar growth in built capacities until a few years from now. The potential cut-backs in DS3 tariffs may also pose risk in the development of this ...

Typical costs and returns for solar panel installations in Ireland with downloadable examples. Number updated for 2025. Includes costs, returns, carbon footprint reduction and all the other numbers you need to know about

Expected ROI of factory solar storage project in Ireland 2025

PV Solar ...

Under RED III, which entered into force in November 2023 (transposition deadline in 2025), Ireland must increase the share of renewable energy in heating and cooling by at least 0.8 pp and 1.1 pp as annual averages for the periods 2021 ...
