

Expected ROI of floor standing battery project in Spain 2026

How much money will Spain get from a battery project?

Some 35 battery sites with a total scale of 690.2 MW/2.82 GWh will receive EUR150 million under the program. A further 10 thermal storage sites will receive EUR6.48 million and add 88.35 MW/591.27 MWh of capacity to Spain's grid. All the projects will be operational in either 2025 or 2026.

How will Spain rank among the top 6 battery producers?

Here are the key elements of Spain's strategy to rank among the top six producers. It is estimated that by 2030, Spain's battery production capacity will range between 42 and 72 gigawatt-hours (GWh), which would place it as the sixth nation with the highest battery production capacity in the European Union (EU).

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

What are the key challenges facing battery storage?

It also outlines the key challenges facing the sector, including underdeveloped frameworks and barriers to investment. The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of renewable energy.

Which battery developers will benefit from government funding?

Battery developers to benefit from the government funding include Benbros, which has eight projects with a total 149.19 MW of project capacity under the program; FRV, which has three projects totaling 119 MW; Iberdrola (nine projects, 55 MW); IM2 Energía (three projects, 25 MW); EDP, which has a 15 MW project; and Sungrow, which has a 5 MW site.
