

Expected ROI of flow battery system project in China 2030

What is the growth potential of the flow battery market?

This trend underscores the growth potential of the flow battery market, as these technologies become crucial in the flow battery energy storage systems market. The Vanadium Redox Flow Battery (VRFB) segment dominates the global flow battery market, commanding approximately 83% market share in 2024.

What is the expected CAGR of the flow battery market?

The global flow battery market size was valued at USD 328.1 million in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 22.6% from 2023 to 2030. The rising demand for energy storage systems globally is the primary factor for market growth.

Is the vanadium redox flow battery industry poised for growth?

Image: VRB Energy. The vanadium redox flow battery (VRFB) industry is poised for significant growth in the coming years, equal to nearly 33GWh a year of deployments by 2030, according to new forecasting. Vanadium industry trade group Vanitec has commissioned Guidehouse Insights to undertake independent analysis of the VRFB energy storage sector.

Which region is the largest market for flow batteries?

The region represents the largest market for flow batteries globally, with China leading the deployment and manufacturing of these systems. The market is characterized by rapid industrialization, increasing renewable energy integration, and growing demand for reliable energy storage solutions.

What is China's first megawatt iron-chromium flow battery energy storage project?

China's first megawatt iron-chromium flow battery energy storage demonstration project, which can store 6,000 kWh of electricity for 6 hours, was successfully tested and was approved for commercial use on February 28, 2023, making it the largest of its kind in the world.

How big is flow battery market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The Flow Battery Market size is estimated at USD 1.02 billion in 2025, and is expected to reach USD 2.08 billion by 2030, at a CAGR of 15.41% during the forecast period (2025-2030).

A flow battery is a rechargeable energy storage system in which an electrolyte flows through one or more electrochemical cells connected to reservoirs or tanks. These batteries are primarily used in stationary markets and are typically ...
