

# Expected ROI of hybrid solar storage project in Ireland 2026

What are Ireland's most ambitious solar energy projects?

Power Capital's Lysaghtstown Solar Farm, Co. Cork, is one of Ireland's most ambitious solar energy projects. With 130 MW of capacity, it generates enough clean electricity to power more than 29,000 homes each year -- a powerful symbol of how Ireland is scaling solar to meet climate and energy goals.

Is SSE Renewables launching a 'sunny south east' project in Ireland?

Leading renewable energy operator and developer SSE Renewables is taking its first steps into solar energy generation and associated battery storage in Ireland, with plans to develop a co-located project at its existing operational wind farm asset in the country's 'Sunny South East'.

How many solar Ireland Proposals are there in 2024?

October 2024: Planning & Development Act 2024 signed -- includes 3 of 6 Solar Ireland proposals. April 2025: 1st revision of National Planning Framework is finalised including solar sections and regional targets (broadly aligned with the Solar Ireland submission).

What is the growth of solar energy in Ireland?

The growth of solar energy in Ireland is remarkable. We now have over 140,000 customers harnessing the power of solar panels. In total, 1.7 GW of solar electricity generation is connected across the transmission and distribution networks with continued strong growth expected over the years ahead.

Will SSE Renewables double its energy capacity by 2026?

Part of the FTSE-listed SSE plc, SSE Renewables is taking action to double its installed renewable energy capacity to 8GW by 2026, and increase renewables output fivefold to over 50TWh annually by 2031.

Can We co-locate solar & battery technology in Ireland's 'sunny south east'?

At Richfield in County Wexford we've identified an ideal opportunity, located in Ireland's 'Sunny South East', to further explore how we can co-locate solar, battery and wind farm technology to realise our full homegrown renewable energy potential.

A Hybrid Solar System contains solar panels, a hybrid inverter, and battery storage to create an uninterrupted energy solution. The solar panels store sunlight and convert it into electricity, while the battery storage stores excess ...
