

Expected ROI of lead acid battery storage project in Germany 2026

How much battery storage will Germany have in 2026?

Industry body the Bundesverband Solarwirtschaft (BSW-Solar) expects around 7 GWh of large-scale battery storage to be added during that period. From ESS News German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

Are rooftop PV systems paired with battery storage in Germany?

In 2019, 46% of all commissioned residential rooftop PV systems had already been paired with battery storage systems. Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany.

What are the key challenges facing battery storage?

It also outlines the key challenges facing the sector, including underdeveloped frameworks and barriers to investment. The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of renewable energy.

What is the new EU Battery regulation?

EU Battery Regulation (Directive 2023/1542): The new regulation for batteries and used batteries covers the entire life cycle and aims to strengthen innovation, growth, and supply chains in the European battery industry. The new regulation also increases regulatory challenges in some areas, such as supply chains.
